JR FURNACE
Beyond Expectation Built to Perfection

Our Profile

J.R. Furnace and Ovens (P) Ltd is among the leading manufacturers and suppliers of Industrial Furnace and Ovens since our inception in 1987. We serve a wide range of heat treatment industrial needs by providing world class capital equipments such as

- ☛ Heat Treatment Furnace
- ☛ Atmosphere Controlled Furnace

We are known for our values and customer-focused business practices. We are able to garner a reputable range of high value government and private customers through our commitment and quality focus. Our products are manufactured using the best quality raw materials & components conforming to the applicable industry norms and quality standards. Our furnaces are appreciated for its process appropriate design, trouble-free performance and long life.

Our furnaces are made using latest technology. They not only provide enduring performance, but can prevent heat loss, helping you save a great deal of energy.

Our products are not only cost-effective but are made in compliance with the clients' required specifications.

Our state-of-the-art infrastructure spread over 55,000 square feet enables us to handle bulk orders and deliver quality products in required specification and time. Our top-notch manufacturing unit is fully laced with

- ☛ Continuous Furnace and Batch Furnace
- ☛ Industrial Ovens

advanced machinery and tools. We have a comprehensive process mechanism to ensure each product is thoroughly tested for quality and performance before leaving our shop floor.

Under the dexterous leadership of our Chairman "Mr.D.Ramesh", we have been able to achieve sustained growth and continuously increasing customer base. He lends strategic direction to the business and steers us to achieve business excellence. Through our quality focused and ethical business practices, we are able to earn a name for ourselves as a reliable player in the global furnace industry.

We take pride in being a vertically integrated organization that entire process of furnace manufacturing from design to testing to commissioning is done in-house.

Manufacturing Range

- ◆ Bogie Hearth/Grooved Hearth
- ◆ Sealed Quench (Integral Quench)
- ◆ Vacuum/Protective Atmosphere Bell Type (Electrical/Gas Fired)
- ◆ Drop Quenching
- ◆ Salt Bath
- ◆ Pit Type
- ◆ Chamber Type
- ◆ Aluminium Melting/Holding, Etc.
- ◆ Conveyor Furnace
- ◆ Ovens/Driers
- ◆ Rotary Retort Furnace
- ◆ Hotdip Galvanizing
- ◆ Washing M/CS
- ◆ Endo Generators

Process Application

- ◆ Ageing
- ◆ Homogenising
- ◆ Solution Treatment
- ◆ Drying
- ◆ Case Hardening
- ◆ Nitriding
- ◆ Through Hardening
- ◆ Marquenching/Austempering
- ◆ Stress Relieving
- ◆ Normalising
- ◆ Forging
- ◆ Spherodizing
- ◆ Isothermal Annealing
- ◆ Aluminium Melting/Holding, etc.
